

Full-Stack Developer — Java / Spring Boot · React / TypeScript

lucamimmo2005@outlook.it +39 392 299 1467 github.com/LucaMimmo05 lucamimmo.dev

SUMMARY

Full-Stack Developer with 4 applications in production: Java/Spring Boot and Quarkus on the backend, React/Next.js and TypeScript on the frontend. **Technical value:** I cover the full cycle — OAuth2 (Open Authorization) and JWT (JSON Web Token) authentication, REST APIs, relational databases, third-party integrations (Google, Microsoft, Stripe) and cloud deployment. I independently own architecture, Git versioning and releases.

PROFESSIONAL EXPERIENCE

Founding Software Developer — Newmann

Feb 2026 – Present

Freelance collaboration · SaaS platform for email management with an AI assistant

- Backend in Spring Boot (Java 21) and Supabase: wrote **45+** REST endpoints and **over half** of the backend commits.
- Built **almost the entire** Next.js admin dashboard, including beta user approval.
- Google OAuth and Gmail API integration (labels, rules, filters) and Outlook via Microsoft Graph, with per-provider caching.
- Three-role model (owner/admin/member) with seats and invitations; Stripe billing, Resend emails and database migrations.

Software Developer — ITMEDIANET S.r.l.

Jun 2026 – Present

Freelance collaboration · internal time and ticket tracking tool

- Built "Monteore IMN" with Laravel/PHP and MySQL: per-activity time tracking and internal reporting, used by **a team of 5**.
- Set up the development environment and resolved PHP compatibility issues on Bitbucket repositories.

INTERNSHIP

Frontend Developer — ITMEDIANET S.r.l.

Jan 2026 – May 2026

- Built **5+** business websites, working directly with clients.
- Gathered requirements, joined client calls and defined layouts.
- Published and deployed sites on the ArubaBusiness platform.

PERSONAL PROJECTS

DevHub — developer workspace

Dec 2025 – Present

Quarkus · Java 21 · React 19 · TypeScript · Redis · PostgreSQL · Tailwind CSS

- Full-stack web app unifying **4** work areas — projects, tasks, notes and commands — in one interface.
- JWT auth with refresh tokens in PostgreSQL, rotation and scheduled nightly cleanup.
- Email OTP (One-Time Password) verification: codes in Redis keyed by email, 5-minute expiry.
- github.com/LucaMimmo05/devhub-fe · devhub-fe.vercel.app

TECHNICAL SKILLS

Backend	Java 21, Spring Boot, Quarkus, Hibernate / Panache, REST API, JWT (JSON Web Token), OAuth2, PHP / Laravel
Frontend	React 19, Next.js, TypeScript, Angular, Tailwind CSS, shadcn/ui
Data & Cloud	PostgreSQL, MySQL, MongoDB, Redis, Supabase, Vercel, Render
AI	RAG (Retrieval-Augmented Generation), Pinecone, embeddings, semantic search
Tools	Git / GitHub, Bitbucket, Linux, Figma

EDUCATION

BSc (Hons) in Computer Engineering & Artificial Intelligence (EQF 6)
EPICODE Institute of Technology — online · Sep 2026 – Present

Web Developer Program (EQF 5)
ITS Incom — Busto Arsizio · Oct 2024 – Jun 2026

Diploma in Computer Science & Telecom (EQF 4)
IIS Andrea Ponti — Gallarate · Sep 2019 – Jun 2024
